

TransactionDesk Release Notes

20.06.00
June 3, 2020

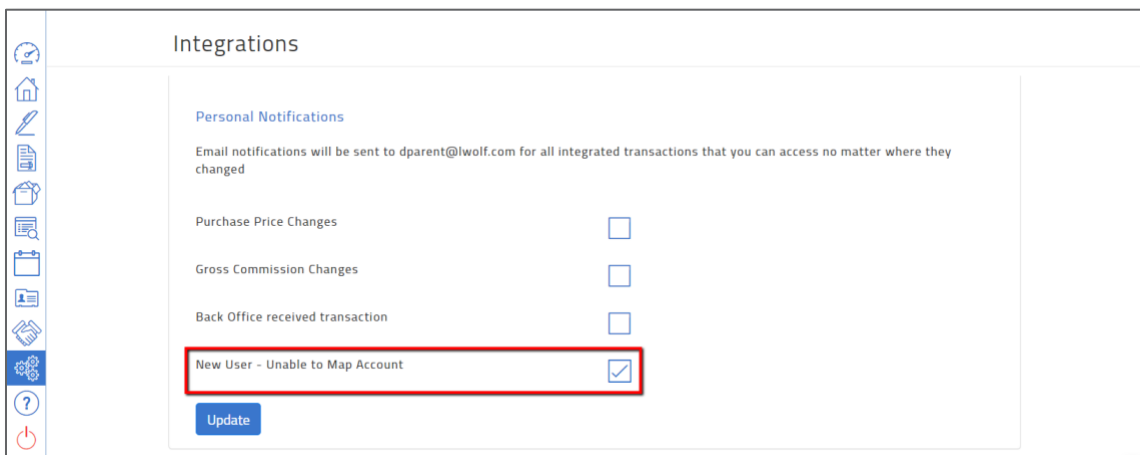

LONE WOLF
TECHNOLOGIES

lwolf.com
1.866.CRY.WOLF(279.9653)

Enhancements

- 1) **New notification options for brokerWOLF Accounting Integration.** When a new user is added to your office and TransactionDesk cannot automatically map their account to brokerWOLF, you can now toggle email notifications regarding this new user on or off at your discretion.
 - a. The notification setting is located under Setup > Integrations > Back Office Accounting Integration

Integrations

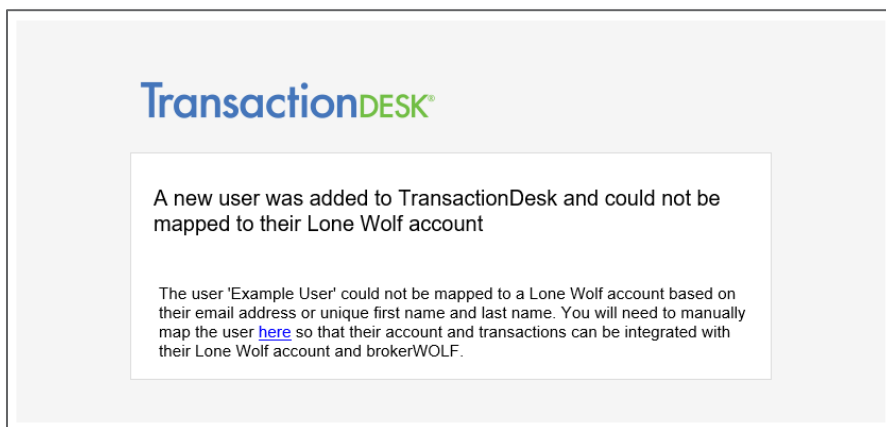

Personal Notifications

Email notifications will be sent to dparent@lwolf.com for all integrated transactions that you can access no matter where they changed

Purchase Price Changes	<input type="checkbox"/>
Gross Commission Changes	<input type="checkbox"/>
Back Office received transaction	<input type="checkbox"/>
New User - Unable to Map Account	<input checked="" type="checkbox"/>

[Update](#)

- b. This setting enables/disables receiving email notifications of the following type:

TransactionDESK®

A new user was added to TransactionDesk and could not be mapped to their Lone Wolf account

The user 'Example User' could not be mapped to a Lone Wolf account based on their email address or unique first name and last name. You will need to manually map the user [here](#) so that their account and transactions can be integrated with their Lone Wolf account and brokerWOLF.

Fixes

- 1) Contact Information – Corrected an issue where listing and selling agent contacts were missing a Company field
- 2) Signed Documents – Corrected an issue where digitally signed documents from 3rd party signature platforms may not have been visible in uploaded documents
- 3) Signing Invitations – Corrected an issue where branding banners were appearing too small on signing invitation emails
- 4) Deleted Signing Notifications – Corrected an issue where deleting completed signings may have sent an unnecessary email notification to the signers regarding the deletion
- 5) Quick Review Tool – Corrected an issue where the Update Agent option on the Quick Review screen may have produced an error that prevented sending of the update email
- 6) Forms – Corrected an issue where forms may not have been auto-saving before being sent to Authentisign
